Programme Summary/Details.

IOT is something that won't leave any physical or hypothetical idea unaffected. Everyone ought to be able to retrieve any content from any device at any time from anyone located anywhere and who is a part of any business or service, through any path or network, as it necessitates communication between objects. Valuably, 'accessibility' is a basic element that influences the exhibition of IOT

Viva Institute of Technology Master of Computer Applications Department, located at Shirgaon organized seminar On "Future of IOT with Opportunities & Challenges". The Webinar will be of immense use for Students who wish to understand and experiment with latest cutting-edge technologies and potential application. Objective of seminar to represent latest technologies of IT industries and Prepare Students for their technical Paper and Research. The speaker in their inaugural address impressed upon the students need and importance of technology in industry in today's competitive global environment. Through this program it was ensured that students were able to Understand Corporate Working Environment and learned the new technology.
