Department of Electronics and Telecommunication Engineering

Academic Audit Report

Academic Audit for AY 2023-24 of Electronics & Telecommunication engineering department is conducted on 12th November 2024 by external auditor.
It is based on code of conduct and actions taken in relation to continuous improvement.

Remarks by External Academic Auditor-

The following points were noted during the visit.

1. Technical Magazine should be based on theme yearly.
2. Increase Alumni Interaction
3. Add impact of internship and other activities.
4. Prepare case study of mentees.
5. Assessment of self learning.
6. PO mapping with activities.
7. Conduct training for non teaching staff

Department strength:

1. Teaching-learning records are maintained very well.
2. Self-learning of faculties through FDP/ NPTEL is appreciable.
3. Good student achievements.
4. Appreciate CO with PI and PO mapping

Department weakness:

1. Collaborative Research publications in SCI Indexed/Scopus/UGC care journals.
2. Need to initialize proposals for research funding.
3. Sponsored project / Consultancy

Subject: Letter of Appreciation.

Dear Madam,

We are really grateful to you for your valuable time and effort as **External Academic Auditor** for our Electronics and Telecommunication Engineering department on **12th November 2024**. Your guidance was very much informative, knowledgeable and motivating to our faculty members.

Your valuable suggestions will be helpful for the growth of department and institute.

Hope for similar support in future too.

Thanking You.

Remarks by Interdepartmental Audit Committee

1. A significant number of students have actively participated in both external and internal activities.
2. Faculty members have shown strong participation in various Faculty Development Programs (FDPs).
3. Improvement in academic performance is needed in the lower semesters.
4. The department is experiencing a low student enrollment rate.
5. Student engagement in internships has potential for further improvement.
6. Separate value-added courses should be organized for students in SE, TE, and BE.
7. IA attainment is not documented in the course file.
8. The IA question paper requires the signature of the domain expert and the Head of Department (HOD).
9. Incorporate flipped classrooms, group discussions, and role-playing activities.
10. A comprehensive database is needed to track student placements in core industries.

First-Year Students Induction Program

ABOUT INSTITUTE:

VIVA Institute of Technology (Approved by AICTE, New Delhi, DTE, Govt. of Maharashtra and Affiliated to the University of Mumbai) was established in the year 2009 under the aegis of Late Shri Vishnu Waman Thakur Charitable Trust with the aim of imparting higher education in Science and Technology to the aspiring young generations so that they can emerge as competent scientists, engineers, and technologists of repute.

ABOUT INDUCTION PROGRAMME:

VIVA Institute of Technology, Virar, conducted an induction program for the newly admitted First Year Engineering students for the academic year 2023-2024 at the institute premises. The aim of the program was to make the students aware of the academic aspects of the course, to acquaint them with the rules and regulations of the institute, and to give them a bird's eye view of the various magnitudes of engineering and its related career opportunities.

The induction program was brought in with a view to making newly joined students feel comfortable and helping them adjust to the transition from school education to hard-core engineering. The induction program is designed to help learners develop diversified thoughts and environments in their new surroundings and inculcate the code of ethics of the institution with a sense of higher priority. VIVA Institute of Technology has conducted an induction program with the objective of providing students ample time and opportunities to adjust to the transition phase of school education to engineering.

KEY HIGHLIGHTS OF THE INDUCTION PROGRAM:

● **ORIENTATION PROGRAMME**

The Induction program started with the orientation program on 18th August 2023. The aim of the program was to introduce the parents and student's introduction of the college and to make them aware of the academic aspects of the course, the rules and regulations of the Institute as well as ensure parental participation in monitoring the performance and progress of the students.

The program was inaugurated with the lighting of the lamp by the principal, Dr. Arun Kumar, and other dignitaries. The Principal, while delivering the inaugural speech, emphasized the prime importance of core values mainly dedication, discipline, etc. He stated the importance of utilizing the knowledge of engineering in its application for the betterment of society.

In a brief address to the students and parents, the HOD of Humanities and Applied Sciences, Dr. Ajazul Haque, congratulated students for joining the VIVA family by selecting the VIVA Institute of Technology. The HODs of different departments briefed the students about departmental facilities, activities, and achievements and requested that the students and parents understand and abide by the institutional code of conduct.

Prof Deepak Dubey delivered a presentation on necessary information about the academic design of the first-year B.E. Course and the University norms and examination pattern.

● MENTORING

The students were divided into groups of ten, department wise and they were warmly welcomed by their respective mentors. Each group is headed by one student in the third year of engineering in the respective department. One faculty member is assigned as a mentor for the group of 20 students. Then mentors explained the necessity of mentoring and the roles and responsibilities of both mentors and mentees.

● DIAGNOSTIC TEST

A diagnostic test was conducted to check the basic knowledge of students in English, Mathematics, and Computer Proficiency. The test comprises 25 MCQs for 25 Marks to assess the student's proficiency in the respective subjects.

● PROFICIENCY MODULES

Based on the diagnostic test, weak students were found and for them, proficiency sessions were organized. The college implemented various Modules for the enhancement of the proficiency of the students in various subjects like English, Mathematics, and computers.

During these sessions, various experts and experienced faculties conducted crash courses on particular subjects. English crash course was conducted by Dr. Trupti Patil and Dr. Prashant Pawar. The mathematics course was held by Prof. Jayesh Jain, Prof. Shiksha Singh and Prof. Bhavika Thakur for Computer. Besides expertise sessions, students were also provided with YouTube link to various proficiency-related videos to further expand their knowledge.

● FAMILIARIZATION OF DEPARTMENT AND INSTITUTE

The heads of all Departments briefed students about the infrastructure and various facilities available at the departments. The mentors toured the students for their specific departmental visit, as well as the library, canteen, gymkhana, and other available institute amenities, to familiarize them with the institute as a whole.

● YOGA SESSIONS

Yoga is an invaluable gift of India's tradition. Regular practice of yoga helps an individual achieve self-control for a better life, physically, mentally, and spiritually. A Yoga session was carried out for the first-year engineering students on all induction days. Warm-up exercises were performed. The students were shown various asanas, followed by Omkar chanting. Along with this, students were also provided with YouTube links to various yoga-related videos.

● **UNIVERSAL HUMAN VALUES SESSION**

The need for value education and its process has gained the utmost importance in today's era. The Universal Human Values session was conducted by Dr. Shwetal Churi for the holistic development of the students and to encourage them to be good human beings for the betterment of society and the universe as a whole. Through this session, they could be able to understand the process of Self Exploration with basic human life aspirations. It was for the purpose of familiarizing participants with Human Values and Professional Ethics and to generate interest in value-based living.

● PHYSICAL ACTIVITY- SPORTS

The sessions, which were devoted to physical activities, were divided into two segments, in the first part, Indoor Sports competitions like chess, carom, and badminton were held. In the second part, Outdoor sports competitions were held like cricket, football, volleyball, kabaddi, and kho-kho, for the development of a sense of responsibility and team building.

● CREATIVE ARTS, CULTURAL AND LITERARY ACTIVITY

The College performed various artistic, cultural and literary activities like painting, collage, sketching, dance, essay writing, storytelling, group discussions, debating and enacting a play were conducted to develop the social and interpersonal skills of the students. Further, the YouTube link to various videos related to art, cultural, and literary activities were given to students.

The modules or topics that were covered through YouTube videos or demo videos were later included in the student's regular timetable, where every week one hour was specially devoted to enhancing and practicing the skills.

At the end of the Induction program, all the first-year engineering students were asked to provide 360° feedback on the induction program and submit it to their assigned mentors.

INVITATION

The Department of Humanities and Applied Sciences of VIVA Institute of Technology, is organizing an **Orientation Programme** for the welcoming of first year engineering students. The event would be organized on **Friday, 18th August 2023** and the venue is fixed at seminar hall, 4th floor at 9.15 am. All the teaching and non-teaching staff members are cordially invited for the programme.

We hope that we would get your valuable presence in the event because your presence means a lot for us and for the event.

Schedule for the Programme:

- ❖ Welcoming of Gathering
- ❖ Lightening of the Lamp & Saraswati Vandana
- ❖ Welcome note by the Principal
- ❖ Address note by the HOD
- ❖ Information regarding Institute and Departments (PPT Presentation)
- ❖ Address Note by Exam Cell Head
- ❖ Address note by the HOD/Department Representatives
- ❖ Address note by TPO Head
- ❖ Address note by NSS Head
- ❖ Vote of Thanks

Department of Electrical Engineering

VISION

To aspire for excellence in imparting quality education in the field of Electrical Engineering with an eagerness of developing a professional mindset along with good human values.

MISSION

- To maintain a benchmark in quality of educational standards in the field of Electrical Engineering.
- To provide a platform for exploring a professional mindset.
- To promote ethical practices for developing good human values.

Programme Educational Objectives (PEOs)

- To provide students with the knowledge of basic sciences and social sciences in general and Electrical engineering in particular, so as to impart the necessary skills to analyze and synthesize electrical circuits, algorithms and complex apparatus.
- To inculcate in students Professional attitude, effective communication skills and capability to succeed in multi-disciplinary and diverse fields.
- To provide technical knowledge, skills and competence to identify, comprehend and solve problems in industry, research and academics related to power, information and hardware.
- To prepare and inspire the students to become future researchers/scientists with innovative ideas for a sustainable development.

Programme Specific Outcomes (PSOs)

- The ability to analyze, design and simulate electrical system and implement them in various application.
- The ability to apply engineering knowledge, technical skill and solution of complex problem in various field of electrical engineering.

PROGRAM OUTCOMES

• **PO1: Engineering Knowledge:**

Apply knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems

• **PO2: Problem Analysis:**

Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

• **PO3: Design & Development of Solutions:**

Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

• **PO4: Conduct Investigation of Complex Problems:**

Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusions.

• **PO5 Modern Tools Usage:**

Create, select and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

• **PO6: The Engineer and Society:**

Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

• **PO7: Environment & Sustainability:**

understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

• **PO8: Ethics:**

Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.

• **PO9: Individual & Team work:**

Function effectively as an individual and as a member or leader in diverse teams, and in multidisciplinary settings.

• **PO10: Communication:**

Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

• **PO11: Project management & Finance:**

Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

• **PO12: Life-long Learning:**

Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

| Course Objectives | 1. To get awareness about non-linear loads in power system. 2. To understand the concept of Flexible AC Transmission System 3. To introduce the operation of various FACTS controllers. |
| Course outcomes | Upon successful completion of this course, the learner will be able to: 1. Analyze the problems due to non-linear loads 2. Suggest the solution to improve power quality. 3. Illustrate the aspects of flexible ac transmission system over conventional ac transmission system and analyze the concept of load compensation. 4. Categorize the static shunt and series compensation for transmission line. 5. Outline the concept of voltage and phase angle regulators |

| Module | Contents | Hours |
|--------|--|-------|
| 1. | Power Quality Introduction: Disturbances, Unbalance, Distortion, Voltage Fluctuations, Flicker, Quality Assessment | 03 |
| 2. | Harmonics and its effects : Definition of harmonics, odd and even harmonics, Harmonic phase rotation and phase angle relationship, Causes of voltage and current harmonics, individual and total harmonic distortion with problems, Power assessment under waveform distortion with numerical, Effects of harmonics on rotating Machines, Transformers and Cables, Overloading of Neutral conductor | 07 |
| 3. | Power quality improvement: Power factor when both voltage and current are sinusoidal, Power factor compensation using capacitor (vector diagram and numerical included), power factor when voltage is sinusoidal and current is non-sinusoidal (numerical included), Effect of capacitor compensation in power factor improvement under non-sinusoidal condition. Mitigation of harmonics- Passive filters- Advantages and disadvantages of passive filters- Active filters-shunt connection, series connection and hybrid connection, Instantaneous PQ theory. | 10 |
| 4. | General concept of FACTS and Load Compensation: Transmission Interconnections, Flow of Power in AC system, What Limits the Loading Capability, Power Flow and Dynamic Stability Considerations of a Transmission Interconnection, Relative Importance of controllable Parameters, Basic Types of FACTS Controllers, Benefits from FACTS Technology, Objectives in load compensation, ideal compensator, Practical considerations, Power factor correction and Voltage Regulation in single phase systems | 08 |
| 5. | Static shunt and series compensators: Objectives of shunt compensation, Methods of controllable VAR generation, Variable impedance type static Var generator (TCR, TSR, TSC, FC-TCR), Switching converter type Var | 08 |

Assessment:

Internal Assessment consists of two tests out of which; one should be compulsory class test (on minimum 02 Modules) and the other is either a class test or assignment on live problems or course project.

Theory Examination:

1. Question paper will comprise of 6 questions, each carrying 20 marks.
2. Total four questions need to be solved.
3. Q.1 will be compulsory, based on entire syllabus wherein sub questions of 2 to 5 marks will be asked.
4. Remaining questions will be randomly selected from all the modules.

UNIT TEST - I

Class: BE
 Division: --
 Subject: Power Quality & Flexible AC Transmission systems

Date: 21/02/24
 Duration: 1 Hr.
 Marks: 20

Note:

- All questions are compulsory.
- Draw figures wherever possible.
- Assume suitable data whenever required, but justify the same

| Que. No. | Questions | Marks | CO | BL | PI code |
|----------|--|---------|------|------------|---------|
| 1 | Solve <u>any one</u> from the following: | 10 each | | | |
| a | A 5-MVA transformer is loaded to 4.5 MVA at a power factor of 0.82 lag. 1) Calculate the leading kVAR necessary to correct the power factor to 0.95 lag. 2) If the transformer has a rated conductor loss equal to 1.0% of the transformer rating, calculate the energy saved assuming 24-hour operation at the operating load. (Assume cost the energy is Rs 0.05/kWhr) | | CO-3 | L3 (Apply) | P1.3.1 |
| b | In the circuit shown in Figure, $V = 480\text{ V}$, $R = 1\ \Omega$, and $L = 1\text{ mH}$; calculate, Active power, Reactive power, Power factor angle and Power factor. Calculate 1) What is the leading reactive power necessary to correct the power factor to 1.0? 2) Also what is the leading kVAR required to correct the power factor to 0.98?  | | CO-3 | L3 (Apply) | P1.3.1 |

| 2 | Solve <u>any one</u> from the following | 05 each | | | |
| a | Explain the impact of poor power quality on utility and consumer. | | CO-1 | L2 (understand) | P1.2.1 |
| b | Illustrate the importance of Power Quality Monitoring and assessment. | | CO-1 | L3 (Apply) | P1.2.1 |
| 3 | Solve <u>any one</u> from the following | 05 each | | | |
| a | Discuss the effects of harmonic distortion on capacitors. | | CO-2 | L2 (understand) | P1.2.1 |
| b | Calculate the total harmonic distortion of a voltage waveform with following harmonic frequency makeup: Fundamental $V_1 = 114\text{ V}$, $V_3 = 4\text{ V}$, $V_5 = 2\text{ V}$, $V_7 = 1.5\text{ V}$, $V_9 = 1\text{ V}$ | | CO-2 | L3 (Apply) | P1.3.1 |

(REV-2012) (CRSGS) / T0849 - FINITE ELEMENT ANALYSIS

Q. P. Code: 24911

(3 Hours)

Max. Marks: 80

Note:

1. Question 1 is Compulsory
2. Solve any three from remaining five
3. Figures to right indicate full marks
4. Assume suitable data if necessary

Question No.

Max. Marks

- Q.1 a) Write short note on Advantages and limitations of Finite Element Method. 20
b) Derive shape function for 1D quadratic element in natural co-ordinates.
c) Explain plane stress and plane strain conditions with figure.
d) Elaborate convergence with example.

- Q.2 a) The governing differential equation for the steady state one dimensional conduction heat transfer with internal heat generation is given by

$$\frac{d}{dx} \left[k \frac{dT}{dx} \right] = q \text{ for } 0 \leq x \leq L$$

where

k = coefficient of thermal conductivity of the material,

q = internal heat generation

Develop the finite element formulation for linear element. Use Rayleigh Ritz method, mapped over general element.

- b) For the two bar structure shown in Fig, determine the nodal displacements and stress in each member. Take $E = 70 \text{ GPa}$ and area for both members $= 200 \text{ mm}^2$. 10

- Q.3 1) Solve following differential equation by Galerkin method. 10

$$\frac{d^2u}{dx^2} + u = x^2, 0 \leq x \leq 1$$

Given Boundary Conditions are: $u = 0$ at $x = 0$, $\frac{du}{dx} = 1$ at $x = 1$

Find values for $u(0.3)$ & $u(0.6)$

Q. P. Code: 24911

- b) Find the displacement, stresses and strain in the elements of stepped bar as shown in figure. Take $E = 200 \text{ GPa}$. 10

- Q.4 a) Find the deflection and slopes at nodes and reactions at supports for the beam as shown in figure. Take $E = 200 \text{ GPa}$, $I_1 = 2 \times 10^7 \text{ mm}^4$ and $I_2 = 1 \times 10^7 \text{ mm}^4$. 12

- a) Derive shape function in natural coordinate system for eight noded quadrilateral element. 08

- Q.5 a) A linear interpolation functions for a triangular element as shown in figure. 10

- b) Find the two natural frequencies of transverse vibrations of a beam fixed at both ends. Use Lumped mass matrix. Assume length of beam as 1 unit, $EI = 10^6$ units, $\rho A = 10^6$ units. 10

- Q.6 a) Evaluate the stiffness matrix for the CST element shown below. 10
Coordinates are given in mm. Assume plane stress condition.
Thickness = 10 mm, $E = 200 \text{ GPa}$ and $\nu = 0.3$.

- b) Explain significance of Jacobian matrix. Derive for CST element. 10
