Date 27/03/2026

Programme Details:

Oscillations-Convergence 2026 is an intercollegiate event with four tracks: Major project, Minor project, poster making, and reel making competition. Several colleges participated in the competition. Students from EXTC branch competed in four fields at VIVA Institute of Technology.

The major project competition was organised specially for the BE students who showcased their final major projects. In the minor project competition, TE and SE students competed. In the poster creating competition, students created visually appealing posters to present their ideas and provide information. The reel creating competition, evaluated videos based on their virality.

Indeed, it was a wonderful event with several projects relating to diverse topics on show, such as robots, IOT-based, drones, and software-based systems. The evening concluded with meritorious projects receiving attractive cash rewards. A total of 120 people participated. Registration was completed at 11 external colleges.
